ORANGE VOLCANO

ORANGE VOLCANOES

Materials:

- An orange
- Knife and spoon
- Bowl
- Baking soda – few tablespoons
- Vinegar – few cups
- Food coloring
- Measuring cup/ glass to our vinegar from

Instructions:

1. Place your orange on a flat surface. Slice the top of the orange off and scoop out all the orange from inside just like if you were scooping out a pumpkin, (you can eat this so it's not being wasted).
2. Put your hollow orange in your bowl. Put about 1 tablespoon of baking soda into your orange.
3. Pour some vinegar into a measuring cup/glass (few cups) and add some food coloring.
4. Mix well.
5. Pour the colored vinegar into the orange and watch what happens!
6. You can keep pouring more vinegar into the orange once the fizzing stops. See how long it will keep erupting!
